The Chinook Women's Institute will meet at the home of Mrs. E. Jacques on Wednesday, May 6, at 3 o'clock in the afternoon. Every body welcome.

Mrs. D. Stewart, who has been visiting for the past three months at the home of Mr. and Mrs. R. Stewart, left on Sunday for her son's home at Sedalia.

Mrs. George England, of Red Deer, is visiting in the meantime at the home of her parents, Mr. and Mrs. J. K. Yeats. She is accompanied by her little daughter.

S. H. Smith was a visitor in Calgary over the week-end.

Mr. A. O. McNeil will conduct service in the Chinook Church next Sunday evening. Sunday School at 11 a.m.

Owing to heavy rains during the past week seeding in the Chinook district has been delayed somewhat.

The ladies card club met this week at the home of Mrs. J. S. Smith. The prize was a lovely plant won by Mrs. Lee. The consolation going to Mrs. Vanhook. The club will meet at the home of Mrs. J. L. Carter next Tuesday evening.

Mrs. A. Robinson and her daughter, Euphonia, who have been spending the winter in Calgary, returned to their farm in Kearville district this week.

Mr. Spittal, Nazarene Minister of Coltholme, will conduct a service in Chinook on Sunday evening, May 10, at 7.30.

G. W. Yeats, of Calgary, arrived in town this morning to visit his mother who is seriously ill.

Mr. Fred Stroh Dies On Monday

We regret to announce the death of Mr. Fred Stroh, of Big Stone, which occurred on Monday morning last. Mr. Stroh was 53 years of age, and had been in illhealth for some time. He leaves to mourn his loss his widow and eight children.

The funeral took place on Wednesday at the Chinook cemetery.

CARD OF THANKS

We wish to thank our many friends and neighbors for their kindness and sympathy expressed during our recent sad bereavement. We especially thank the choir; and we are grateful for the beautiful floral offerings.

The Family of Robert Dobson.

Book on Citizenship

The book "Studies in Citizenship" commenced by the late Jas. McCaig of the Provincial Government, before his death, has now been completed by G. W. Gorman of the Education Department, and others, and will be put into use in grades 6, 7 and 8 in the Alberta Schools.

J. A. MCCOLL

Special representative of the Vancouver Harbour Commissioners in Alberta and Saskatchewan

Bringing home to grain growers and shippers the advantages of the Western grain route and the grain-handling facilities at the Port of Vancouver, Mr. McColl is visiting every grain centre in Alberta and Western Saskatchewan this summer, addressing Boards of Trade, U. P. A. locals, Farmers' Institutes, and personally calling upon grain shippers to make them acquainted with what Vancouver has to offer them as a shipping centre.

Having been an Alberta farmer for 18 years, and being born and raised on an Ontario farm, Mr. McColl, who formerly represented Acadia in the Alberta legislature, has a practical knowledge of the grain situation that is proving invaluable on his present mission. The experience gained on the land has been amplified by personal inspection of the Vancouver facilities and the advantages of the Western route.

It was Mr. McColl, at the time Minister for Acadia, who was responsible for the Federal government taking action to drive the Board of Trade, U. P. A. Commissioners, down to the railroads to handle grain on coastwise lines, his activities on that occasion saving many farmers from losing their entire crop.

Former Resident of Chinook Passes Away

Mrs. Anna Pearl Meade, wife of Henry Meade, of Bellevue, Alberta, a former resident of Chinook, passed away on Wednesday, April 22, in the Holy Cross Hospital, Calgary, after a short illness. The late Mrs. Meade was 44 years of age and is survived by her husband. She came to Alberta from Colorado 14 years ago, and until two years ago Mr. and Mrs. Meade were in business in Chinook. The funeral took place last Sunday when the body was laid to rest in the Blairmore cemetery. The news of her death came as a great shock to her many friends in the Chinook district. Mrs. Meade was very much liked by all who knew her, her sunny disposition winning her many friends wherever she went. The deepest sympathy is extended to her husband in his sad bereavement.

Local Changes In Canadian National Timetable on May 3

Local timetable changes of the Canadian National Railways summer schedule, which will become effective on May 3, according to J. T. Kerr, local agent, will be as follows:

No. 9, from Saskatoon and Winnipeg, will arrive here at 1.38 a.m. instead of 1.33 a.m.

No. 10, from Saskatoon and Winnipeg, will leave Chinook at 2.37 a.m. instead of 2.30 a.m.

J. N. Key will hold a community auction sale in Chinook on Saturday afternoon, May 2, at 1.30. Anyone desiring to list articles for sale, notify The Chinook Advance or J. N. Key.

A Romance of the Spanish Main

CAPTAIN BLOOD

by RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini

"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Captain Peter Blood, buccannier, rescues Arabella Bishop, with whom he is in love and Lord Wale, an emissary of King James, from two Spanish ships. Lord Wale offers Blood a commission under James, but the buccannier had been sent as a slave to the Barbadoes by this same King and he declines. To place Arabella in safety he sails into the teeth of the British fleet commanded by Colonel Bishop, governor of Barbadoes, whom Blood had once made walk the plank. Blood's crew would fight to the end, but Blood orders the ship to heave to that Arabella may be landed safely.

CHAPTER XVII.—Continued.

"Again you misapprehend me," cried Lord Julian, between concern and indignation. "That is not intended. Your followers will be included in your commission."

"And if you think they'll go with me to hunt their brethren—the Brethren of the Coast? D'ye think I could take a commission of King James's? I tell you I wouldn't be selling my hands with B—thief and pirate's hands though they be. Thief and pirate is what you heard Miss Bishop call me today—a thing of scorn, an outcast. And who made me that? Who made me thief and pirate? D'ye dream, man, what it is to be a slave? But there, I grow hot for nothing at all. I explain myself, I think, and God knows, it is not my custom. I am grateful to you, Lord Julian, for your kindly intentions. I am so. But ye'll understand, perhaps. Ye look as if ye might."

Lord Julian stood a moment, watching the tall figure as it moved away towards the taffrail. His eyes followed his arms fall helplessly to his sides in dejection, he departed.

CHAPTER XVIII.

The Service of King James

Miss Arabella Bishop was aroused very early on the following morning by the hoarse voice of a lander and the insistent clanging of a bell in the ship's belfry. In his cabin Lord Julian was already astir and hurriedly dressing. About him in the waist, where all last night had been so peaceful, there was a friendly active bustle of some three-score men. By the rail immediately above and behind Lord Julian, stood Captain Blood in altercation with a one-eyed giant, whose head was swathed in a red cotton kerchief, whose blue shirt hung open at the waist. As his lordship, moving forward, revealed himself, their voices ceased, and Blood turned to greet him.

"Good morning to you," he said, and added: "I've blundered badly, so I have. I should have known better than to come so close to Jamaica by night. But I was in haste to land you. Come up here. I have something to show you."

Wondering, Lord Julian mounted the companion as he was bidden. Standing beside Captain Blood, he

looked astern, following the indication of the Captain's hand, and cried in amazement. There, not more than three miles away, was land—an uneven wall of vivid green that filled the western horizon. And a couple of miles this side of it, bearing after them, came speering three great white ships.

Wolverstone looked down sardonically upon Lord Julian. "So that you're like to be in yet another sea-fight afore ye've done wit ships, my lord."

"That's a point we were just arguing," said Blood. "For I hold that we're in no case to fight against such odds."

"The odds be damned!" Wolverstone thrust out his heavy jaw. "We're used to odds. The odds were braver at Maracaybo, yet we won out, and took three ships. They were heavier yesterday when we engaged Don Miguel."

"Aye—but those were Spaniards."

"And what better are these?—Are ye afraid of a lubberly Barbadoes planter? What ever do you, Peter? I've never known ye scared afore."

A gun boomed out behind them. "That'll be the signal to be to," said Blood, in the same listless voice, and he fetched a sigh.

Wolverstone squared himself before his captain.

"I'll see Colonel Bishop in hell or over his lies to for him."

"Oh, but—by your leave," his lordship interposed, "surely there is nothing more for less than stored sunlight."

"Sixty per cent. of breakdowns in health are due to the retention in the system of waste products. Light energy needs this condition by stabilizing the blood."

"The rays of light which are most valuable to health are those to the right of the spectrum, and it has been found that when these rays are excluded from an area in which a plant has been placed, the plant dies."

"These rays are caught and held by the falls of the earth and are the vitamins of which so much has been heard lately."

"Oranges and lemons contain a higher percentage of stored sunlight than any other fruits in the world."

"I'll see Colonel Bishop in hell or over his lies to for him."

ing to be apprehended from Colonel Bishop. Considering the service you have rendered to his niece and to me, I assure you that my word counts for something in England."

"Oh, aye—in England. But this ain't England, damme," Wolverstone laughed.

Came the roar of a second gun, and a round shot splashed the water less than half a cable's length astern. Blood leaped over the rail to speak to the fair young man immediately below him by the helmsman at the wheel.

"Bid them take in sail, Jeremy," he said quietly. "We lie to." But Wolverstone interposed again.

"Hold there a moment, Jeremy!" he roared. "Wait!" Captain and loyal follower faced, their glances met, with defiance braving dull anger, surprise and pain.

"There is no question," said Blood, "of surrender for any man aboard save only myself. If Bishop can report to England that I am taken and handed, he will magnify himself and at the same time gratify his personal rancor against me. I'll send him a message offering to surrender aboard his ship, taking Miss Bishop and Lord Julian with me, but only on condition that the Arabella is allowed to proceed unharmed. It's a bargain that he'll accept. If I know him at all."

"Ye're surely daft even to think of it, Peter."

"Not so daft as you when you talk of fighting that." "Before we're run another half-mile we shall be within range."

Wolverstone swore elaborately, then suddenly checked. Out of the tall of his single eye he had espied a trim figure in grey silk that was ascending the companion. So engrossed had they been that they had not seen Miss Bishop come from the door of the passage leading to the cabin. And there was something else that those three

men on the poop, and Pitt immediately below them, had failed to observe. Some moments ago Ogil, followed by the main body of his gun-deck crew, had emerged from the booby hatch, to fall into muttered, angrily vehement talk with those who, abandoning the gun-tackles upon which they were laboring, had come to crowd about him.

Even now Blood had no eyes for that. He turned to look at Miss Bishop, marvelling a little, after the manner in which yesterday she had avoided him, that she should now venture upon the quarter-deck. Her presence at this moment, and considering the nature of his altercation with Wolverstone, was embarrassing. Captain Blood bared his head and bowed silently in a greeting which she returned composedly and formally.

"What is happening, Lord Julian?" she enquired.

As if to answer her a third gun spoke from the ships.

"They are ships of the Jamaica fleet," his lordship answered her.

Before more could be added, their attention was drawn at last to Ogil, who came bounding up the broad ladder, and to the men lounging aft in his wake. Blood, confronted him.

"What's this?" the Captain demanded sharply. "Your station is on the gun-deck. Why have you left it?"

"Captain," Ogil said, and as he spoke he pointed to the pursuing ships. "Colonel Bishop holds us. We're in no case either to run or fight."

"Ogil," said he, in a voice cold and hard as steel, "Your station is on the gun-deck. You'll return to it at once, and take your crew with you, or else . . ."

"There's will not serve, Captain," Captain Blood's hand closed over the butt of one of the pistols slung before him.

(To be continued)

Proving Value Of Sunlight

Rays Contain Vitamins So Essential To Health

"Vitamins," said Dr. Hector Munro, an English specialist, "are nothing more nor less than stored sunlight."

"Sixty per cent. of breakdowns in health are due to the retention in the system of waste products. Light energy needs this condition by stabilizing the blood."

"The rays of light which are most valuable to health are those to the right of the spectrum, and it has been found that when these rays are excluded from an area in which a plant has been placed, the plant dies."

"These rays are caught and held by the falls of the earth and are the vitamins of which so much has been heard lately."

"Oranges and lemons contain a higher percentage of stored sunlight than any other fruits in the world."

"I'll see Colonel Bishop in hell or over his lies to for him."

ing to be apprehended from Colonel Bishop. Considering the service you have rendered to his niece and to me, I assure you that my word counts for something in England."

"Oh, aye—in England. But this ain't England, damme," Wolverstone laughed.

Came the roar of a second gun, and a round shot splashed the water less than half a cable's length astern. Blood leaped over the rail to speak to the fair young man immediately below him by the helmsman at the wheel.

"Bid them take in sail, Jeremy," he said quietly. "We lie to." But Wolverstone interposed again.

"Hold there a moment, Jeremy!" he roared. "Wait!" Captain and loyal follower faced, their glances met, with defiance braving dull anger, surprise and pain.

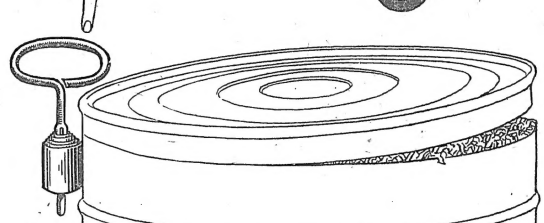

"There is no question," said Blood, "of surrender for any man aboard save only myself. If Bishop can report to England that I am taken and handed, he will magnify himself and at the same time gratify his personal rancor against me. I'll send him a message offering to surrender aboard his ship, taking Miss Bishop and Lord Julian with me, but only on condition that the Arabella is allowed to proceed unharmed. It's a bargain that he'll accept. If I know him at all."

"Ye're surely daft even to think of it, Peter."

"Not so daft as you when you talk of fighting that." "Before we're run another half-mile we shall be within range."

The Political Wrecker

Men Who Put Their Own Fortunes Before the Good of the Country

Every political society is honey-combed with enemies—men of ill-will, who put their own fortunes before the good of the country. But perhaps the most deadly enemies of the state are the philosophers, the idealists, the traitors in utopias, the reformers in a hurry. We congratulate ourselves upon being "practical" people, but even in our own history some of its most sombre pages are those which are consecrated to the description of the wreckage inflicted by men of good intentions.—London Morning Post.

The Educational Need

Settling forth as his view on the important question of "What Is Alberta's Foremost Educational Problem?" Hon. Percen Baker, minister of education, addressing several hundred Alberta teachers at the fifteenth annual convention declared that in his opinion the most pressing educational need today was for a grade eight education for the minimum objective for every boy and girl in the province.

Old Styles Create Amusement

Men's hats of olden days afforded the Berlin public much amusement during the recent exhibit of clothing. Held to contrast the styles of the last 100 years with the styles of today.

High hats, much taller than those worn today, and as shaggy as a Newfoundland dog, appeared in the windows of many haberdashers. Curious straw hats lent by museums also produced broad smiles among the throngs.

How Robert M. Koenig Found Remedy for Pimply Skin

For years my skin would break out every once in a while—and sometimes did very little to help me.

I read a doctor's article stating that pimply skin usually comes from the stomach—and bowels not getting rid of the poisons.

I tried Carter's Little Liver Pills for a few days—and since that time my skin is smooth and clear. Now I tell my friends the right way of getting rid of a broken out skin—and also of steering clear of upset stomach and liver troubles. Carter's are all you claim for them.

Animal Showed Great Bravery

Mother Cat Rescued Three Kittens From Blazing Building

During the terrible Jersey City fire an act of bravery on the part of a mother cat brought forth the cheers of the crowd. As a powerful stream of water fell upon the blazing wall of one of the many burning buildings, it struck the cat with such force that it lifted her across the street. As soon as she recovered her breath she hurried back to the building where she had left her four new-born kittens, and emerged carrying one in her mouth, which she laid carefully on the opposite side of the street.

The crowd tried to keep her from again entering the burning building, but three times she made the trip, each time bringing out one of her wee babies. The last attempt was frustrated by a solid wall of fire and slowly and sadly she returned and lay down by her little family. It was not an agent of the Society for the Prevention of Cruelty to Animals, or a police officer, or even an adult person who took the rescued family, but a little Polish girl, herself made homeless by the fire, who placed the mother cat and kittens carefully in her shirt, and carried them to a place of safety.

To Film Calgary Stampede

Universal Film Company to Secure Pictures of Big Event

Negotiations have been completed whereby Hoot Gibson and the Universal Film Company and Guy Weadick will come to Calgary this summer to photograph scenes in the Calgary stampede, to be incorporated in the next Hoot Gibson picture release. This will mean the bringing of a large company here and the expenditure of approximately \$100,000.

Planning Biggest Tunnel

The greatest tunnel in the world soon will be built under the Mersey river, in England, to connect the city of Liverpool with Birkenhead and adjacent towns on the south bank of the river, says Popular Science Monthly for April. It will have an internal diameter of 44 feet, greater than the Hudson River tunnel now nearing completion. The tube will contain two decks, one for automobile, the other for street cars.

Japan Building Warships

The Japanese navy department has announced plans for the construction of twenty-two warships, with a total tonnage of 124,900, to include eight first-class cruisers, three second-class cruisers, ten destroyers and an aeroplane mother ship.

Honey in Manitoba

The 1,800 beekeepers in the province of Manitoba, with 22,113 colonies, produced 3,292,000 pounds of honey valued at \$185,000 in 1921, according to official returns made by the provincial apiarist.

Alberta's Sunflower Crop

Development of Product Due to Increase in Dairy Industry

One of Alberta's newest crops, sunflowers for silage, amounted to 160,650 tons last year, while fodder corn, also comparatively new, amounted to 269,888 tons. The development of these field products is largely due to the expansion of the dairy industry. Alberta's dairy production last year was valued at close to \$23,000,000, and is rapidly increasing. Britain is providing an attractive market for butter, and cheese is finding an increasing demand.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty commendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers, throughout the country, not only use them for their own little ones, but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colic and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from "Dr. Williams' Medicine Co., Brockville, Ont."

Not His Fault
A tramp had been admitted to the casual ward of an English workhouse late one evening, and the following morning "Nuly" appeared before the master.

"Have you taken a bath this morning?" was the first question he was asked.

"No, sir," answered the man in astonishment, "Is there one missing?"

A Determined Man
"I told my wife that if she bobbed her hair I would leave her."

"But she bobbed it; and you're still living with her?"
"You bet I am. I'll show her she can't bluff me."

IT HITS THE SPOT

Don't suffer from lumbago, neuralgia or other pains. Apply Minard's to the aching spot and get quick relief.

Always keep it in the house.

DOCTOR ADVISED AN OPERATION

Read Alberta Woman's Experience with Lydia E. Pinkham's Vegetable Compound

Provost, Alberta.—"Perhaps you will remember sending me one of your books a year ago. I was in a bad condition and would suffer awful pains at times and could not do anything. The doctor said I could not have children unless I went under an operation. I read testimonials of Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me to take it. After taking three bottles I became much better and now I have a bonny baby girl four months old. I do my housework and help a little with the chores. I recommend the Vegetable Compound to my friends and am willing for you to use this testimonial."—Mrs. M. W. Ross, 800 Notre Dame St., Lachine, Quebec.

Pains in Left Side

Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back and with weakness and other troubles women so often have. I was this way about six months. I saw the Vegetable Compound advertised in the 'Montreal Standard,' and I have taken four bottles of it. I was a very sick woman and I feel so much better I would not be without it. I also use Lydia E. Pinkham's Sanative Wash. I recommend the medicines to my friends and I am willing for you to use my letter as a testimonial."—Mrs. M. W. Ross, 800 Notre Dame St., Lachine, Quebec.

POOR PROSPECTS FOR COMPLETION OF H.B. RAILWAY

Winnipeg.—The Ottawa correspondent of The Manitoba Free Press says: "During the past six weeks there has been a remarkable change in the prospects for the completion of the railway to Hudson's Bay."

Advocates of the railway in the Progressive group, as well as western cabinet ministers, were optimistic early in the session of obtaining an adequate vote for the completion of the line.

"Now, however, the situation appears to have changed entirely. There even is doubt that the usual vote of \$350,000 will be forthcoming for maintaining the present track, although there has been no official intimation upon which to base these opinions. Cabinet ministers are not as favorable as formerly."

"In an interview, Andrew Knox, M.P., one of the chief advocates of the railway, declared that the prospects of obtaining action at this session of parliament appeared very remote."

Canada's Merchant Marine Loss

Million and Half for 1924 Without Accrued Interest

Ottawa.—The Canadian Government Merchant Marine had an operating loss last year of \$1,410,889, which is \$432,413 less than the loss in 1923, according to the annual report of Sir Henry Thornton, tabled in the house.

It to this operating loss is added interest accrued, amounting to \$1,406,744, and depreciation, amounting to \$2,929,581, the loss for the year comes to \$5,747,214.

This total deficit of \$5,747,214 is \$552,061 less than in 1923.

The report, in reference to the total loss for the year, adds this note: "In order to avoid any misunderstanding, it may be well to call attention to the fact that this amount includes more than \$4,000,000 for interest still charged against the company on its books, in favor of the Dominion Government, and nearly \$5,000,000 for depreciation. Each of these items is calculated on the original wartime cost of the vessels of the fleet."

Research Post Given To Vancouver Graduate

Hugh Keenleyside Named Secretary of World Peace Council

Hugh Keenleyside, a University of British Columbia graduate in arts, has been appointed research secretary of the American National Council for the Preservation of World Peace. Mr. Keenleyside specialized at the Vancouver university and then held fellowships in several other universities, being professor of modern history for two years at the University of Sydney.

His duties will involve research into subjects as to the origin of wars, the development of international arbitration and international law. His headquarters will be in Washington, D.C.

Would Cancel Fire Insurance

Plan Suggested By Fire Preventive Association To Punish Negligence

Ottawa.—Cancellation of all fire insurance benefits to persons who, through their own negligence, are responsible for fires is to be urged upon all provincial governments by representatives of the Dominion Fire Prevention Association. It was also urged that the federal, provincial and municipal governments install sprinkler system on all public buildings.

"That provincial governments make it compulsory for all municipalities to install adequate fire extinguishing equipment and that all isolated rural farm property be provided with at least one chemical extinguisher or portable hand-pump of approved type for fire extinguishing purposes, was also urged."

Pay Wembley Expenses
Fredericton.—The New Brunswick Legislature has passed an estimate for \$15,000 for the provincial exhibit at Wembley Exhibition this year.

Would Harness Tides
Fredericton.—The New Brunswick Legislature may be asked at its present session to give approval to a plan for the harnessing of the tides of the Bay of Fundy, in Passamaquoddy Bay.

Celebrate Ypres
Ottawa.—Survivors of the "First Thirty Thousand," the "Red Chevron Association," celebrated the tenth anniversary of the second battle of Ypres at a banquet here, April 25.

Future Peace In Europe

Should Be Based On Goodwill, Thinks Sir Esme Howard

Princeton, N.J.—Reasons "for Great Britain's rejection of the Geneva protocol for compulsory arbitration of international disputes and hopes held out for future peace in Europe, by means of the security pacts proposed by Germany, were outlined by Sir Esme Howard, British ambassador to the United States, in an address before the English-Speaking Union.

"It is impossible to say now," he asserted, "how the security pact discussions will end, but we can at least all hope that they may lead to a settlement by agreement and to the establishment of a peace, not dependent upon huge and ruinous armaments, but based on goodwill and common sense."

"If that comes about," Sir Esme continued, "the next disarmament conference will not be long in coming. Of that we may be sure. If, on the other hand, this hope also fades away and dies, why, then, I frankly do not see any other alternative than the maintenance of our national security; and what irony to call it security by force of arms and military alliance, financial rule and the inevitable armament race in the end."

Cape Breton Mine Strike

International Behind Miners In Fight To A Finish

Sydney, N.S.—The large part of the support of the international union, and are more determined than ever to carry the struggle through to a successful conclusion," was the statement made by President J. W. McLeod, of District 26, United Mine Workers of America, in an interview, in which he announced the receipt of formal notice from International President J. L. Lewis to the effect that funds of the international organization had been placed to the credit of the district for immediate use, and that a full meeting of the district executive would be held at Chace Bay to decide on the most efficient method of distributing the strike among the miners of the district.

Request Action On Peace Rail Outlet

Vancouver Board of Trade Asks For Immediate Report

Vancouver.—Insistence that the Federal Government should obtain from railway heads of Canada their report and recommendations on suit, able outlet for the Peace River country and that action to relieve the northern agricultural belt from its isolation should be taken at the present session of parliament, was contained in a resolution passed by the Vancouver board of trade.

By reaffirming their stand in favor of linking the Peace River Valley with the Pacific coast, the board of trade, united with the associated boards of trade of the Peace River, is calling upon the government for action.

Decrease In Export Of Canadian Wheat

Thirty Per Cent. Lower Than In March, 1924

Ottawa.—Canada's wheat exports in March, 1925, were about 30 per cent. of the exports in March, 1924. Last month, 4,322,518 bushels of wheat went out of Canada. In March, 1924, 13,416,100 bushels were exported. Exports of flour were only slightly lower, or 1,397,819 barrels, compared with 1,285,240 barrels in March, 1924. Exports of barley were higher and of oats and rye somewhat lower. In the eight months ended March 31 last, wheat exports totalled 104,219,929 bushels compared with 204,001,636 bushels in the previous corresponding eight months.

Chemical Warfare

Deathless Wars Are Now Predicted For The Future

Omaha, Neb.—Something approximating "deathless wars" are soon to be the order, in the opinion of Major-General Amos Fries, chief of United States army chemical warfare service. Chemical warfare, the general said, is being developed along the lines of incapacitating great cities and their people, rather than securing sudden loss of life.

Manitoba Taking No Action
Winnipeg.—No action will be taken by the Manitoba Government in connection with the fruit combine recently investigated by the federal authorities, according to a decision reached at a cabinet meeting. The cabinet decided it was solely a Dominion Government affair, as most of the evidence was heard outside this province.

Alberta Ranchers To Engage In Dairying

Belleville, Ont.—Hundreds of yearling Holstein heifers are being brought up in Hastings County for shipment to Alberta, where ranchers are going into dairying in earnest. One Alberta company, it is said, has five hundred of these yearlings on a farm near Stirling, ready for shipment, and it is stated that five hundred more will be shipped out of the Madoc section. The buyers are in various parts of the country where the black and white predominate. They are going in for milk producing, according to a Belleville man interested in the beef and dairy business. Some bulls are also being bought.

Trying To Discontinue "Picture Bride" System

U.S. and Canadian Authorities Shutting Down on Scheme

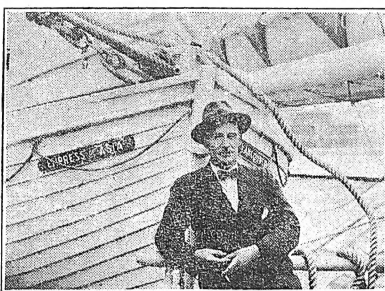

Washington.—United States and Canadian authorities, according to a statement by Commissioner General Husband, of the immigration service, are trying to break up the "picture bride" system of bringing Greek girls into this country via Canada. It appears Greek girls are brought to Canada and married to a United States citizen, and then brought to the United States. Both Canada and the immigration authorities here are shutting down on the scheme.

PREFERABLE TO KEEP SEPARATE RAILWAY LOANS

Ottawa.—Differing sharply from critics of the budget, Herbert Marler, Liberal, St. Lawrence-St. George, Montreal, held, in the house, that the financial statement presented by Hon. J. A. Robb, acting minister of finance, was "clear to analyse and clear in its effect." He did not agree that railway loans should be included in the total of net consolidated debt, Operation of the National Railways had been "an extremely expensive matter" for the people of the Dominion, but, while our railway debt was a debt of the Dominion, Mr. Marler thought it was another matter that it should be included in the consolidated debt.

For one reason, Mr. Marler argued, the question of public ownership was on trial, and if, at any subsequent date, it was terminated, "it would be distinctly preferable to have as large a part as possible of our railway debt kept separate from our other financial dealings." He submitted, however, that the public should be given each year a statement of the combined debt, showing in one part also consolidated debt, with its increases or decreases, and in another part any increase in the railway indebtedness.

Mr. Marler estimated that in the last six years the Dominion had put \$585,848,974 of new money into railways. "Member who are so much in favor of public ownership," he added, "or who desire extensions and costly improvements, will pause for a moment and consider how long we can keep up this pace—or how any of them can expect decrease in our taxation if this yearly expenditure is continued." The only way to reduce taxation was to spend less.

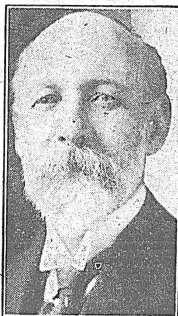

Antarctic Again Calls Commander Horton

The "wanderlust" has again seized upon Lieutenant-Commander W. A. Horton, R.N., F.R.G.S., who was, it will be remembered, a chief engineer with the last Scott expedition, when in 1913 the famous explorer perished, with his companions, in the far reaches of the Antarctic continent.

This time Commander Horton will accompany the Discovery, under Captain J. R. Stenhouse, on a journey to the Shetland Islands, in search of scientific data. The vessel is now refitting at Portsmouth and is expected to leave there early this summer and to call at the Falkland Islands for supplies in October before the voyage into the frozen regions commences. Commander Horton recently came to Canada on the Canadian Pacific S.S. "Empress of Asia" from Shanghai, where he was posted on a short naval appointment, enroute for England and left the Dominion on the Canadian Pacific S.S. "Maricou" from St. John. He has taken part in several other Polar expeditions, notable among which are the fatal Scott expedition and Shackleton's Antarctic voyage in the "Quest."

Condemns Dole System

SIR JOSEPH COOK

Australian High Commissioner in London, who has made a sweeping condemnation of the dole system obtaining in England.

Deny Dookhobors Hurt By Police

Did Not Use Unnecessary Force Says Inspector

Nelson, B.C.—Informed over the long distance telephone that the Dookhobors were demanding a commission of inquiry into the trouble at Grand Forks and were alleging that women and children had been beaten by government officials, Inspector W. R. Danwoody, at Grand Forks, made the following statement: "It was in personal charge of the operation of seizure of all Dookhobor property, and at no time was any more force used than was necessary in executing the distress warrants. "At the mill a large number of women had gathered and endeavored to block the way. Thirty or forty of these had to be lifted out of the way to permit entry. A few pushed in and tried to help the women block our getting in, and they also had to be removed, and were put in behind the fence. We tried not to hurt anybody and I can say that nobody was hurt."

Prince Enjoyed His Visit To Nigeria

Penetrated Far Into Interior and Received Native Chiefs

Lagos, Nigeria.—Concluding his memorable visit to Nigeria, during which he penetrated far into the interior and received the native chiefs, the Prince of Wales left Lagos aboard the battle cruiser Repulse in continuation of his southern voyage. He was enthusiastically cheered by a large crowd upon his departure. The Prince found his trip through Nigeria interesting and enjoyable, in spite of the great heat encountered.

There was an impressive military display as he boarded the Repulse.

Many Applicants For Job

London.—More than 300 applications, including those from an army general and a holder of the Victoria Cross, have been received for the position of city marshal, whose chief duty is to wear a gorgeous uniform and ride a gallant steed at the side of the state coach whenever the lord mayor goes forth. The salary attached to the position is only £300. The appointment will be made next month.

Sapiro Files Suit Against Henry Ford

Detroit.—Henry Ford and the Dearborn Pub. Co., of which he is owner, were named defendants in a \$100,000 bill suit filed in the United States district court by Aaron Sapiro, originator of a plan of co-operating marketing for farmers. Sapiro alleges that articles defamatory to his character have appeared in the Dearborn Independent. The articles, the declaration alleges, charge Sapiro with being one of a conspiracy of Jewish bankers, who seek to control the food markets of the world.

Dates Arranged For Alberta Coal Probe

Investigation of Industry Will Be Held In May

Edmonton.—After having secured a great mass of documentary evidence during the past few months, on the condition of the coal industry in the province, the Alberta coal commission, composed of H. M. E. Evans, chairman, and Frank Wheatley, have definitely fixed dates for their sittings in different parts of the province, during the month of May. The dates which have been arranged are:

Edmonton, May 6 to 8; Calgary, May 11 to 13; Drumheller, May 14 to 15; Lethbridge, May 18 to 20; Blairmore, May 21 to 22.

It is possible that at a later date supplementary hearings also may take place at the two larger cities and possibly at other points.

JUGO-SLAVIA HAS NO DESIGNS ON BULGARIA

Belgrade.—The Jugo-Slav Government has issued a note vehemently protesting against reports regarding Jugo-Slavia which it claims have been disseminating from Bulgarian centres. The note says these reports are to the effect that a terrorist campaign is being carried on in Bulgaria with a view to provoking disorders and civil war. "So as to permit the army of our western neighbor, that is to say, Jugo-Slavia, to pass the frontier and occupy Bulgaria."

The note affirms that Jugo-Slavia always has maintained the best relations with Bulgaria, "notwithstanding raids of brigands from Bulgaria proper," for under the eyes of official Bulgaria.

Three labor members of the British Parliament who arrived from Sofia, Bulgaria, declared that they were convinced several hundred persons were killed without trial, and on the merest presumption, after the recent bomb explosion in the cathedral at Sofia.

Those who arrived were J. C. Wedgwood, W. MacKinnon and P. D. Malone. They were in Sofia at the time of the bomb outbreak and broke subsequent events.

"From the quantity of information we gathered," they said, "we are convinced that several hundred persons arrested were killed without trial; and on the merest presumption. "We employed all the influence at our disposal to induce the government to prevent the militarists from massacring men and women apprehended in the course of the recent police operations. Thousands of persons suspected of Communist tendencies or of belonging to the Left Socialists were held in custody."

Installing Radio Compass

Inaugurate New Era in Navigation of Great Lakes

Alpena, Mich.—Installation at the Lighthouse tender, Amaranth, here of a radio compass marks what shipping men generally regard as the inauguration of a new era in vessel navigation of the Great Lakes. Similar radio compass stations are to be installed at the more important lighthouses of the lakes. During times of poor visibility, each station will send out a distinctive radio call for the guidance of vessels.

Another Restriction Removed
Moscow.—The Soviet Government have made a further concession to the peasantry by agreeing to allow them to employ salaried laborers on their farms. Heretofore, this was forbidden, as the present Soviet law specifies that no one shall possess more land than he is able to work himself.

Sheep From Royal Ranch
North Portal.—Five sheep valued at \$250, from the ranch of the Prince of Wales, High River, Alberta, were shipped through this port to L. W. Cutler, Lethbridge, recently.

BRITAIN LOSING CONTROL OF SEA IS CONTENTION

London.—Britain is losing control of the sea, according to the annual Sir George's Day message of the Navy League.

The league warns Britain that while she is building only five cruisers the United States and Japan each are building, or have projected, eight cruisers. The focus of sea power, the league continues, has shifted from European waters to the Pacific.

"We wish to draw attention to one pregnant fact," the league declares.

"In the course of this year the Australian Commonwealth and New Zealand for the second time in this century will welcome a fully organized American battle fleet. They never have set eyes on a British battle fleet. They may well ask themselves to whom should they look for their 'sure shield' if the day of trouble should dawn."

Egyptian Discloses Plot

Assassinations of General Staff Planned Many Political Murders

Cairo, Egypt.—The judicial authorities have published a summary of the confessions of some of the men accused in connection with the assassination last November of the Sirdar of Egypt, General Sir Lee Stack.

Abdel Fattah Ayyal, one of the accused, is quoted as declaring in the course of his statement that, following the failure of the conversations between the Egyptian and British plenipotentiaries in London on the Sudanese and other questions, he met with Dr. Shafik Mansour and Mahmud Ismail at Dr. Shafik's house, where it was decided to commit a series of political murders, with the Sirdar as the first victim.

"The declaration says the trio believed the independence of Egypt could only be gained by the political murders. All the persons mentioned in Abdel's confession have been arrested. Mahmud Ismail was an official of the ministry of pious foundations."

King Boris a Prisoner

Reported That He Is Detained in the Royal Palace

Rome.—A despatch from Belgrade to the Tribuna says that King Boris of Bulgaria has been imprisoned in the Royal Palace by the order of General Lazaroff, because the Nationalist military element objected to the sovereign's request that Premier Tzankoff resign to permit the formation of a coalition cabinet, including Opposition elements.

Another despatch from Belgrade dated by way of Vienna, declares that Jugo-Slavia, offended by Minister of the Interior Rusoff's declarations before the Bulgarian National Assembly, regarding the activities of the Jugo-Slav legation at Sofia, has demanded an explanation and is threatening to break off diplomatic relations.

Will Build Pullman Airplanes

To Be Used For Trans-Continental Commercial Flights

Chicago.—Plans for the construction by the Pullman Company at Pullman, Ill., of fleets of all-Pullman airplanes for service in trans-continental commercial air flights, have been revealed by the chief engineer of the company. It has been decided, he said, to operate the planes along the same lines as Pullman sleepers are used in railroad traffic. The craft would be manned by Pullman employees but operated by pilots of leasing concerns.

Three Times in Three Rivers
Three Rivers, Que.—Three Rivers will have three different hours this summer.

Among the manufacturers, daylight saving time will be in effect from May 2 to September 27.

The city council has decided to have daylight saving time from June 15 to September 2.

On the other hand, standard time will remain in Catholic churches and in most religious congregations.

Jail For Grain Bandit Chased
Winnipeg.—John Moran, alleged "brains" of a province-wide grain bandit ring, said to be responsible for wheat thefts totalling thousands of dollars, was sent to jail for one year when he pleaded guilty to the charges against him in provincial court.

Leaving For The U.S.
Glouce Bay, N.S.—More than 2,000 Cape Breton people have taken up their residence in the United States since last June, according to the United States census, and are still leaving at the rate of 25 a day.

For Canada Of To-Morrow

Means For Protecting Our Forests Against Extinction

Just now we are hearing a great deal about our forest resources, their conservation and their destruction. The Federal and Provincial Governments, organized clubs, pulp and paper associations, schools, churches, radio stations and theatres are co-operating in emphasizing the necessity of preventing forest fires and conserving our Canadian forest resources, says the natural resources intelligence service of the department of the interior.

The potential value of the forests as a very great asset is being emphatically stressed, but the value of the forests as a source of employment affects us all vitally at such a time as the present when the employment problem is acute. Then how many of our industries, directly or indirectly, rely on the forests for their necessary equipment and supplies. The connection with sports, such as hunting and fishing, the value of the forest, is of first importance, for if the forests were destroyed, these sports would rapidly become non-existent. The beauty of the forests, lakes and mountains, the abundance of game and fish, attract many visitors and provides health and pleasure, also a large annual revenue to Canadians.

Forests grow, mature, deteriorate and decay. Once a tree has attained maturity nothing is to be gained by postponing its cutting. When cutting the mature tree, however, the protection of the small tree struggling for its existence nearby should be assured. The small trees of today are our forests of the future.

Dr. C. D. Howe, dean of the faculty of forestry, University of Toronto, suggests that in each district where timber rights are granted, the average annual growth per acre be ascertained and only the larger trees, to an extent not exceeding the annual growth of timber as a whole per acre, be cut. Our forests would be growing in value year by year if this plan were followed.

The planting of trees and shrubs along highways and bordering fields for windbreaks will, as the practice increases, become a means of increasing our wood supply materially and, in the course of years, may build up a stand of valuable timber.

Foreign Loans Helping Bolshevik Propaganda

Money Used For Soviet Work and Not For Russia

Catherine Breshkovskaya, known as the "grandmother of the Russian revolution," who spent 60 of her 82 years in Siberian prisons, as a consequence of her work for the overthrow of the czarist regime, regarded the Soviet regime as the "greatest plague which has ever descended on Russia and the civilized world."

Freed from a lifetime of torture in the icy wastes by the advent of Kerensky, Mme. Breshkovskaya left Siberia in 1917 and went to the United States, landing at Seattle, and was acclaimed on her journey to New York by enthusiastic throngs, seeing in her the embodiment of old Russian freedom. When she got back to Russia after her journey around the world, millions of peasants and workers hailed her as the incarnate spirit of liberty. But her triumph was short lived. With the arrival of Lenin and the signature of the Brest-Litovsk treaty, her hopes died once more and once again she took the road to exile.

"The power of the Bolsheviks is in direct proportion with the amount of money they are able to cajole out of foreign groups," she says. "When the Soviet leaders ask for a foreign loan it is not because Russia needs the money but because the Bolshevik needs money for propaganda. How long will foreign nations continue to be fooled by them? The life of the real Russian radicals under the Soviet rule is a martyrdom worse than I knew under the czars."

A Pocket Screwdriver
An inventor has designed a folding screwdriver that can be carried in the pocket with one's knife. Three blades of different sizes lock and open separately, giving the compact tool a wide range of usefulness. When the blades are not in use, they are locked tight in the handle.

The Season's Miracles
This time of the year I never see a had on an ash. I never hear a frog croak down in the alder of the swamp after supper. I never cut a maple switch and see the sap fall like an ash without wondering why folks hanker after miracles when they can watch the coming of spring and think nothing of it.—Galeb Pease's Almanac.

W. N. U. 1274

Early Feeding Of Calves

Great Care Must Be Taken In Proper Hand Feeding

Not alone should a dairy calf be well bred, but also well cared for in raising, if a good producer is to be obtained. Bred of its dam when a few hours or perhaps days old, the efficiency of the method of hand feeding is one of the greatest importance. Dealing with this subject in Seasonable Hints, Mr. Geo. W. Muir, of the animal husbandry division, describes the system followed at the Dominion experimental farm, Ottawa. A table covering practically half a year shows the different quantities of whole milk that are given in the first six weeks and after that skim milk, fat substitutes and dry meal. Amplifying the details supplied by the table, Mr. Muir says, that if the calf is not left with the cow a day or more, so that it can get a proper feed of the first milk or colostrum, care is taken to see that it gets a feed or two of this milk by hand. It is continued on its dam's milk as long as possible. If for any reason is not available, milk from another comparatively fresh cow is used, small quantities being given three times a day and care taken to avoid over-feeding. Changes are made gradually, reducing for a day or two rather than increasing the amounts fed. Cleanliness is a first consideration, the milk being fresh and the pails well scrubbed out after each feeding.

As regards fat substitute, the homestead used at the Ottawa experimental farm is two parts each of finely ground oats and corn meal, and one part ground flax seed, and a pinch of salt and bone meal. If corn is not freely to be obtained, more oats with hulls sifted out can be used and for ground flax seed in similar circumstances, two parts ground oil cake may be substituted. Scedling water is poured over the mixture, which is well stirred, sufficient having been made in the morning for a day's feeding. This mixture is fed the same night and the following morning in milk.

Wireless Telephony

Expected That Canada Will Be Able To Speak Directly To England By Next Fall

By October it is believed that Britain will be in direct wireless telephone communication with Canada, Australia and South Africa.

This is the somewhat startling announcement made by the Morning Post, which says that this communication will be established through the Marconi station, which will be erected at North Peterson, near Bridgewater. At first the station will be used purely for experimental work, but officials who are cognizant with the delays of recent developments are confident that the development of commercial telephones between these countries will be rapid and that the regular interchange of voices across the Atlantic is now only a matter of months. It is predicted that by next fall Canada will be able to speak directly to Australia.

Could Not Do More

Colored Man Worried About Carrying Out Judge's Sentence

The deputy-warden of a certain midwestern penitentiary was questioning a number of new inmates. Among them was a tall gentleman of color, who kept scratching his head and sighing so deeply that it at last attracted the deputy's attention.

"What's the matter, boy?" he asked, not unkindly.

"Mah sentence," exclaimed the new arrival. "Ah can't do all dis time the judge gib me."

"How much are you doing?" inquired the deputy.

"Life, sah."

"Well," remarked the deputy, "just do what you can of it."

Temperate Scotland

Less Whiskey Now Being Drunk In The Land of the Heather

"There is not the least doubt that less whiskey is being drunk in Scotland," declared Dr. Currie, of Edinburgh Infirmary to the royal commission on lunacy. Mental cases, due to drink, he said, had fallen from 60 per cent, in 1883, to 26 per cent at present.

Dr. Currie added that he was "attracted" the increased price of whiskey and the military discipline exercised during the war were partly responsible for the abstinence.

A Medical Wedding

The bride, the bridegroom, the best man, two bridesmaids and the uncle of the bride, who gave her away, were all doctors at a recent marriage ceremony in London, Eng.

Co-Operation In Education

Correspondence Courses Suggested For The Four Western Provinces

A resolution recommending that the provincial governments of the four western provinces name a committee of one representative each to consider co-operative night class courses and correspondence courses, passed by the first Western Canadian conference of vocational experts at the Calgary Institute of Technology, will be forwarded to the various governments. A. W. Crawford, director of technical education, interviewed by the Canadian Press, expressed the opinion that the discussions of the conference had been eminently successful, once the committee recognized that same practical results should be achieved. The conference discussed every phase of vocational training and the problems peculiar to every province were dealt with.

Handling More Freight

C.N.R. Tonnage Received At Vancouver Shows Big Increase

A comparison of freight tonnage moved by the Canadian National system to the Pacific coast was made in a written answer to a question by Sir Henry Drayton, in the House of Commons. Tons of revenue freight received at Prince Rupert on the Canadian National Railway from points east, totaled, in 1925, 38,862, and in 1924, 26,227. The freight tonnage on the National road received at Vancouver from points east in 1925 was 336,561, and in 1924 was 676,512.

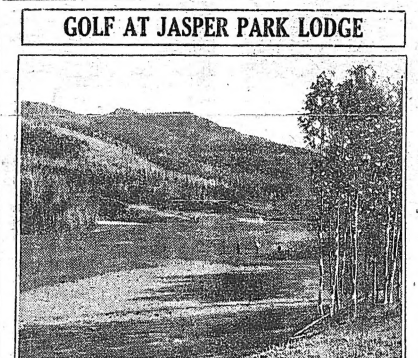

Followed Directions

Doctor:—"Well, you are certainly looking better than I expected to find you."

Patient:—"I think it is because I followed the instructions on your medicine bottle."

Doctor:—"Very likely. What were they?"

Patient (grimly):—"Keep the bottle tightly corked."

GOLF AT JASPER PARK LODGE

When it was decided to add golf to the attractions of Jasper National Park it was quite rightly conceded that the setting, as well as the importance of the place in the Canadian National tourist traffic plan, justified a course built to the highest standards. The policy adopted from the outset was that the golf should be good enough to be appreciated for itself, the beauty of the scenery being merely an added attraction. Since the course has been cleared and is revealed to the visitor he concludes that the railway was fortunate to have such a great extent of golfing territory so immediately available to the Lodge. A year ago, when most of it was Rocky Mountain forest, the golfing possibilities were not so apparent. Work was commenced early in the summer of 1924 and was rushed forward with such success that nine holes will be available for play during the summer of 1925.

Fortunately there is no clay at Jasper. This should delight the golfer's heart. The underlying strata is generally gravel like all the Athabasca River basin in which Jasper is situated, so that the fairways have under them that generally subsoil essential to the production of good golfing turf. Sand was also found on the property in sufficient quantity and quality to fit all requirements. The fairways are clear of actual outcroppings of rock, but these show up around trees and greens, giving a pleasing rugged setting but never interfering with the play. The route selected encloses a great heart-shaped area with the first hole starting and the last hole finishing at the lower point of the heart, and at the top there is a double back and further along a loop of three holes which are on a peninsula running out into Lac Beauport. This route is quite an exceptional one and there is a complete absence of paralleling in the ordinary sense of the term, although the 10th has the 6th immediately to the right of it.

Received Tumultuous Welcome

Duke and Duchess of York Have Returned From Africa

The Duke and Duchess of York returned to London from their African tour. They had been absent since December 1.

Exceptionally tumultuous welcome greeted them, due to the coincidence of an English cricket team, returning from its Australian trip, happened to be travelling on the same train. The assemblage at the station, numbering fully 5,000, was composed largely of cricket fans, who cheered their favorite cricketers and the royal couple with equal enthusiasm.

Beekeeping For Women

Provides Pleasant and Profitable Summer Vacation Says Dominion Apiarist

Writing on "Beekeeping for Women," in the Dominion Apiarist, C. B. Gooderham says: "After a few stings one usually becomes immune and takes little notice. If bees are properly handled and the operators avoid the danger from this source. Should a sting be received, it should be at once scraped out, and not pulled with finger and thumb, as this will force all the poison into the wound." Mr. Gooderham does not see why women should not make good as beekeepers. "For teachers or business women, beekeeping provides a means of spending a pleasant and profitable summer vacation out in the open air, and a few of these are owning and operating fair-sized apiaries," he writes.

Who Was Guilty?

Sergeant (drilling awkward squad).—"Company, Attention. Company! Lift up your left leg and hold it straight out in front of you!"

One of the squad held up his right leg by mistake. This brought his right-hand companion's left leg and his own right leg close together. The officer, seeing this, exclaimed angrily: "And who is that blooming goat over there holding up both legs?"

Says Delegates Were Deluded

British Trade Unionists Did Not Get Real Facts Concerning Russia Says Emma Goldman

Emma Goldman, the one-time anarchist, deported from the United States in 1919, told a London audience that the report of the British trade unionists who recently visited Russia, was "from beginning to end a travesty of the actual truth."

This report of a delegation of the British trade union congress, placed the situation in Russia in a most favorable light with reference to public health, housing and the prison system, and declared that the Soviet Government was achieving remarkable results.

Emma Goldman declared that the Soviet Government had used every effort to hypnotize the delegates and make them take "stage mummery for reality," from the very moment of their arrival. No one, she asserted, who went to Russia as an official guest, was able to meet the Russian people, or even remotely see what was happening to them.

American Industry Threatened

Germany Shipping In Quantities Of Synthetic Wood Alcohol

America's \$100,000,000 wood distillation industry is threatened with extinction by German chemistry. It was declared at the meeting of the American Chemical Society in Baltimore.

Germans are making synthetic methanol, formerly known as wood alcohol, from water gas, and are shipping it into this country in such quantities, it was said, as to arouse fears that the American production of methanol from hard wood will be wiped out.

Another forward step of German science was described by Dr. Franz Fischer, director of the Kaiser Wilhelm Institute at Mulheim-Ruhr, who said that a process exists related to that by which synthetic methanol is produced is being employed to manufacture liquid motor fuels from water gas.

America's only hope in this and in other similar exigencies which may arise, it was declared at the meeting, lies in research.

Should Grow Barley With Oats

Gives Farmer Higher Returns Than Grain Growing Alone

For six years in succession an experiment was conducted at the Ontario Agricultural College in the growing of oats, barley, spring wheat and peas, separately and in different combinations for the production of grain, says an O. A. C. press bulletin. There were six mixtures having two classes of grain, four having three classes, and one having four classes of grain combination. Of all the mixtures used, barley and oats gave the highest returns, this combination producing 193 pounds of threshed grain per acre more than the highest yielding grain grown alone.

Twenty-five years of work indicate that one bushel of oats and one bushel of barley is the best proportion for mixed grain seedling. O. A. C. No. 21 barley and O. A. C. No. 3 oats have made a combination in "grain mixture seedling" that has given yields superior to any other seedling. These two grains reach maturity at the same time.

Why Boys Leave The Farm

Would Probably Stay If Given Chance For Self-Improvement

"The News-Record has on more than one occasion pointed out the fact that farmers do not 'magnify their calling' as they ought to do. You can hardly expect ambitious boys and girls to stay on the farm if their fathers and mothers are always crying down the farm and its work, and if the only who are going into something else the privileges of an education. Give the boys and girls who elect to remain on the farm the same privileges of self-improvement as those who are going into other lines of work and probably more will choose the farm.—Clinton News-Record.

Alberta Prospects Good

Farmers Looking Forward To Securing A Bumper Crop

Farmers in Alberta are looking forward optimistically expecting a bumper crop this year as they are assured that the late spring and moisture at this period, augurs well for a good season. Farmers south of Calgary state that during the past 20 years there has never been so much moisture in the ground at this season of the year.

A visitor to Alberta is Count de Brants, of Paris, France, who is looking over the country with a view to taking up land.

Faith without works is about as useless as a watch without wheels.

The Next Wheat Crop

Indications Point To Smaller Production In The U.S.

The United States department of agriculture in June, 1924, issued a bulletin which started wheat prices on the up-grade. It reported crop conditions at that time to be the worst in twenty years, and estimated a yield of 2,000,000 bushels below that of 1923. A remarkable improvement in the weather changed the whole situation and gave the country one of the best crops in recent years, but the price remained higher because of lower production in Canada and elsewhere. Another bulletin of the United States department of agriculture, published recently, takes a pessimistic view of winter wheat. It says that indications point to a smaller production in the United States than in any year since 1917, the condition on April 1 being only 68.7 per cent of normal, a decline of 12.3 points since December, compared with an average decline of 4.4 points in the past ten years. The crops suffered severely from winter-killing from Central Ohio to Central Indiana, in Montana, and in the main wheat areas of Nebraska, Kansas, Oklahoma, Texas, Washington and Oregon. Drought and high winds aggravated the damage in the plains region from Nebraska to Texas. Favorable weather would repair conditions in many areas, but the department says that abandonment of acreage has been and will continue to be heavy in sections where the crop has suffered most.—Toronto Globe.

Potatoes From Seed Balls

Good Looking Potatoes Grown From Seedlings In One Season

In his report for 1923 the Dominion horticulturist gives an interesting account of an experiment with potato seed balls that formed on sections in various varieties of potatoes that were being grown at the central experimental farm on Loamy land. Although these seed balls were quite green at the time of harvesting, October 21, they were carefully gathered and stored in paper bags, which were placed in a warm room with the lights open. When the balls began to shrivel the seeds were extracted, washed and spread out to dry on muslin.

In order to obtain tubers of a desirable size the first season, the seed was sown in flats in the greenhouse the last week in March in a manner quite similar to that of sowing tomato seed.

When the plants were sufficiently grown they were put out into flats two by two, inches apart. These were again transplanted into strawberry boxes in warm beds and grown along in this way until June 15, when they were planted out in the field in rows 36 inches apart and 30 inches apart in the rows. By planting them the plants had reached a height of ten to twelve inches. The same cultivation and care that was given the main potato crop was all that was necessary. While a wide variation was found in the habit of growth, it was the rare exception to find a plant that lacked vigor or showed indications of plant diseases, such as leaf roll or mosaic. In fact many of the plants did so well that they produced seed balls.

Out of five hundred hills it was possible in 1923 to select sixty-five hills that gave promise of being of value. The yield from the individual hills ranged in weight from a few ounces up to five pounds, fifteen ounces. Quite a number of tubers weighed between nine and ten ounces, with a larger percentage of the balance running a good table size. An illustration in the report of the products shows three good looking Green Mountain potatoes of marketable size that were grown from the seedlings in one season.

Lessening India's Wealth

Religious Beliefs Fostering Destruction Of Destructive Rats

A former Indian official says that rats are one of the greatest curses of India. There are hundreds of millions of them, and they cannot be exterminated because of religious beliefs. The Hindu will bury the rat, but will not kill him; the Mohammedan, who does not object to killing, knows that without help he can do nothing. And so the evil continues. It is no exaggeration to say that, if the number of rats could be kept down to a reasonable figure, the wealth of India would be increased a fifth.—Youth's Companion.

No Wonder He Kicked

"See here," yelled the angry politician, as he put into the office of the city editor. "What do you mean by publishing my resignation from office in this way?"

"But you gave out the story yourself," replied the editor.

"That's course," replied the editor. "But your fool paper printed it under the head of 'Public Improvements!'"

MAGIC BAKING POWDER

WORLD HAPPENINGS BRIEFLY TOLD

British Columbia will continue at Wenatchee with its exhibits of natural resources.

W. H. Ault, Ottawa, of the poultry division of the Dominion livestock branch, is on a tour of inspection of the west.

A dispatch to the Exchange Telegraph from Constantinople says that the Turkish Government has decided to renew diplomatic relations with Japan.

The London Daily Mail understands that the late Marquis Curzon bequeathed to the nation two historic ruins on his estates. One was built about 1440, and one in 1386.

Two hundred thousand babies, or one in every 38 born, die each year in the United States before reaching their first birthday. It was revealed in a report issued by the Gorgas Memorial Institute at Chicago.

Despite the fact that John Singer Sargent was an American, the authorities granted permission for memorial services to be held in Westminster Abbey, under auspices of the council of the Royal Academy.

More than 250,000 Canadians and Americans will travel to Europe this year, breaking the record of 215,592 set in 1913, the heaviest year in the history of eastward trans-Atlantic transportation, according to estimates by steamship officials.

Radio At Tyre
Paris and London radio concerts have been heard clearly at Srafinad, 12 miles north of ancient Tyre. This was where Elijah's widow lived.

Miss Vera Little

—Vollie's Studio

Chatham, Ont.—"Dr. Pierce's Favorite Prescription was such a wonderful help to me in motherhood that I do not hesitate to relate my experience for it may help other women who suffer at this time. During my first expectant period I got into a terribly rundown state of health, my nerves gave way. I was very weak and my kidneys were bad. I was just as miserable as I could be, when, thru the advice of a friend, I began taking Dr. Pierce's Favorite Prescription and from that time on I did not have any more trouble with either my nerves or my kidneys but kept well and strong and my strength came back very quickly afterwards. My child was very strong and healthy and always has been. (picture above) hardly having had a sick day."—Mrs. Cyril Little, 2 McDougall Ave.

Any drug store in tablet or liquid, or send the Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg.

W. N. U. 1574

Prince Dreads Getting Heavy

Is Too Active To Become Stout Say Specialists

The Prince of Wales, who is in his early thirties, has already begun to fret a little with the fear that he may suffer from embonpoint, say persons close to the royal family.

Just prior to the beginning of his voyage to South Africa and South America he was examined by several specialists, it is declared, and when the trip ends he will be gone over again, being anxious to discover just what effect these ambassadorial jaunts have upon his physique.

During several of his previous tours he took on some weight, and as he has a dread of achieving a figure suggestive of the lines of his grandfather, Edward VII, he has made up his mind to keep tabs on himself with the aid of several well-known specialists.

Among the gymnastic apparatus on board the battle cruiser Repulse, is a sensitive scale upon which will be recorded his ups and downs.

Meanwhile, there is little cause for anxiety, according to the doctors, who have given it as their opinion that the Prince need not worry about overweight, as long as he keeps up the pace he set before his departure, when his almost daily routine was fox hunting in the morning, official duties in the afternoon and dancing for many hours in the evening.

Typical Of Bolshevism

Elaborate Coffin Ordered From Russia By Chinese Was Only Painted Tin

Sun Yat Sen, the Chinese revolutionist, during the later years of his life became infatuated with the Bolsheviki. Before he died he asked to have a burial like that of Lenin. To comply with his wish, his friends requested the Soviet authorities at Moscow to send a bronze coffin with a crystal top. The Bolsheviki leaders promised. When the coffin reached Peking, what was the disgust of the Chinese to find that it was a wooden box covered with painted tin to look like bronze and the expected crystal top proved to be only cheap glass.

Nothing could have been more typical of Bolshevism and the Bolsheviki. In the realm of political ideas no less than in funeral equipment, their bronze was painted tin and their crystal is a poor grade of glass. The coffin offered for Sun Yat Sen may well have been an exact duplicate of the one used for Lenin himself.—Buffalo Express.

Forgot They Had Mummy

One Older Than King Tut Owned By McGill University, Montreal

A mummy of a priestess of the "royal house of Egypt," nearly 2,000 years older than the famous Tutankhamen, in a perfect state of preservation, with hair grey and plentiful, has been unpacked at McGill University, Montreal, after lying in a store-room down town for more than twenty years. It was formerly the property of the Old Natural History Museum, all the contents of which passed into the hands of the local university.

Interest in the mummy was intense and the building in which it is on exhibition was crowded with professors and students. The fact, which were bare, were perfectly preserved, as were also the toe nails. The existence of this had been practically forgotten.

Will Hold Investigation Of Bovine Tuberculosis

Research Council of Canada to Hold Meeting Shortly

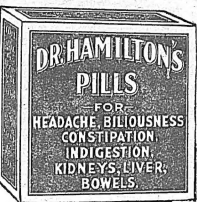

In conjunction with the Dominion department of agriculture, the research council of Canada will conduct an investigation of bovine tuberculosis and plans, as announced by Dr. H. M. Tory, president of the council, call for a meeting during the latter part of May.

Committees, including the most prominent men in bacteriology in Canada, have been named, and it is the intention of the council to investigate the whole question of human and animal tuberculosis. It is possible that the work will be carried on in central laboratories.

The Terror of Traffic

The tornado, because it takes its victims by the hundred in the twinkling of an eye, causes the public to stop and shudder. But the announcement that seven children and five adults were killed on the highways of this state in one week, coupled with the knowledge that such killing will continue week after week, shows that the path of the tornado falls far short of rivaling the highway as an avenue of death.

A little change is always beneficial. Even the scissors sharpeners occasionally feels that he would like to get away from the daily grind.

DR. HAMILTON'S PILLS
FOR HEADACHE, BILIOUSNESS, CONSTIPATION, INDIGESTION, KIDNEYS, LIVER, BOWELS.

SUNDAY SCHOOL LESSON

MAY 3

THE BENEFITS OF TOTAL ABSTINENCE

Golden Text: Daniel purposed in his heart that he would not defile himself with the king's dainties, nor with the wine which he drank. Daniel 1:8. Lesson: Daniel 1:1-20. Devotional Reading: Psalm 65-68.

The Text Explained and Illuminated
A Heroic Resolve, verse 8. Nebuchadnezzar, King of Babylon, directed one of his officers to take Jewish youths of noble families who were especially fair and bright, and have them enter what has been called "The Princes' College of Babylon." For three years they were to receive education for the civil service. They were to be taught the language and learning of the Chaldeans. They were to be nourished with a portion of the food and wine served to the king himself. Among the youths selected were Daniel and three companions. Daniel firmly resolved (purpose in his heart) that he would not defile himself with the king's dainties nor with the king's wine.

Keep the heart with all diligence, for out of it are the issues of life. "A noble heart—purpose is the strongest watchman over external conduct. It is the purposeless life that has no defenses. A liner with engine power and helm and compass and destination can cut her way through the most tumultuous seas. A liner destitute of helm and compass and destination, at the mercy of every fierce and unfriendly sea. Daniel had the mighty safeguard of a "purpose true," and when floods of unfriendly circumstances beset him he held firmly on his course" (Dr. J. H. Jowett).

CLIPSE FASHIONS
Exclusive Patterns
by Hestley

The Suspender Skirt Grown In Favor

Very youthful and becoming is the attractive suspender skirt No. 1055. This model features the inverted or rich plait at either side of centre front and at the side seams. The shoulder straps are cut in one with the skirt, and form a deep oval neck opening and large shoulder straps. The skirt at lower edge is one yard and ten inches, with the flairs laid in. A popular blouse to wear with this skirt is the peasant, with colorful embroidery. No. 1062 has large raglan sleeves gathered into a narrow wrist-band; a gathered neck edge finished with straight binding and fitted hip-band. A note of individuality is given in the embroidery, as one may choose any color. Both patterns are made in sizes 16 to 20 years, the skirt requiring three yards and the blouse 2½ yards of 36-inch material for the 18 size.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

There are bright moments in the life of a schoolmaster. At a recent examination, in general knowledge a pupil defined a volcano as follows: "A mountain with a hole in the top, and if you look down the hole you can see the creator smoking."

Minard's Liniment For Corns and Bunions.

Canada Points the Way

American Paper Draws Attention to Value of Canadian Friendship

Says the Chicago Tribune: Canada plans no retaliation for the Fordney-McCumber tariff, it appears from the budget address of J. A. Robb, the acting finance minister. Many had feared that higher tariffs we had imposed would be met by higher duties in Canada on our goods. Canada's moderation suggested that in future we will do well to adopt the same temper. Canada is our nearest neighbor. We understand each other because as we look out at the world we see as nearly eye to eye as two nations can. Canada's support becomes more important to us every year. Anything which tends to alienate Canadian friendship will prove costly in the long run. We will do well to strain a point in encouraging commerce across our common frontier. No temporary commercial gain could justify the loss of Canadian sympathy.

COLOR IT NEW WITH "DIAMOND DYES"

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or that lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new. Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Another Titled Farmer

Prince Charles Philippe d'Orleans May Take Up Land in West
The arrival recently on the Canadian Pacific steamer Marigot of Prince Charles Philippe d'Orleans, nephew of the King of Belgium, has added another name to Canada's growing list of titled farmers. For the present time, the Prince will visit Lord Selkirk on his ranch at Fort Saskatchewan, and later on he hopes to purchase land near the ranch of the Prince of Wales and join the royal colony located at that section of the province.

Strangled with Asthma is the only expression that seems to describe what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Owens Smallest Dictionary
Mrs. Otto Frederick of Minneapolis, Minn., claims to have the smallest dictionary in the world. It is carried in a pocket and contains nearly 15,000 definitions. It is one and one-eighth inches long, three-quarters of an inch wide and three-sixteenths of an inch thick.

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed off as advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Worth.—"There ought to be a good demand for the book."

Worth.—"What book?"

Worth.—"A published volume of the unwritten laws."

BOTHERED WITH LARGE PIMPLES

Burned and Made Face Sore. Cuticura Healed.

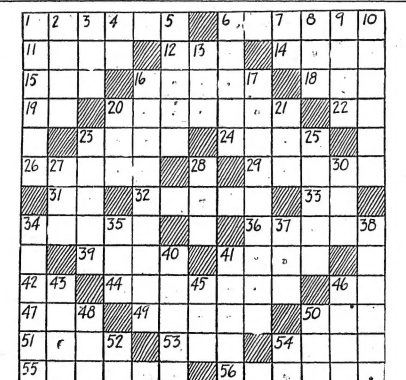

"For four years I was bothered with hard, large, red pimples in blotches on my face and neck. The pimples came to a head and festered and looked terribly, and at times burned and made my face very sore. My face looked so badly that I used to feel embarrassed when I went in public. I began using Cuticura Soap and Ointment and they helped me, and after using three or four cakes of Cuticura Soap and a few bottles of Cuticura Ointment I was completely healed in three months." (Signed) Miss Vera Swamy, 1 Gibson Ave., Toronto, Ont.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes. Get Cuticura at all drug stores. Address: Cuticura Dept., Postoffice Bldg., Montreal, P. Q. Price, Soap 25c, Ointment 25c, Talcum 25c.

Answer To Last Week's Puzzle

Gelatin Factory For West

Australian Corporation Looking For Location For \$1,000,000 Plant
Establishment of a gelatin manufacturing plant in Western Canada at a cost of more than \$1,000,000 is a probability in the near future. A representative of a large Australian corporation was in Winnipeg recently investigating conditions. Where the plant will be located has not been decided as yet, but it will be situated in one of the larger cities of the west.

A British breeder recently sent 800 canaries to New York in one shipment.

No need to suffer with corns, or to run the risk of paying them. Remove them surely and painlessly with Holloway's Corn Remover.
Read the Sign
Mother—"Johnny, did you get that loaf of bread I sent you for?"
Johnny—"No; the store was closed."
Mother—"It couldn't be this time of day. Did you try the door?"
Johnny—"No, 'cause I saw a sign in the window, 'Home Cooking'."

For Aches and Pains Use Minard's Liniment.

Cultivator And Seed Drill Attachment

A Double Purpose Implement that will sow and cultivate in the same operation, placing seed under a mulch on a firm soil.

This attachment can be fitted to Massey-Harris, McCormick or Deering drill. No discs required. Seed is placed immediately under the curve of the standard which is protected by two wings holding back the soil until the seed is placed. Blades 2, 4 and 7 inches can be used. Depth of seeding regulated by the depth wheel in front. Cultivator blades and standards are so constructed that most soil, instead of falling to the sides comes up and over, falling to the rear, covering all seeds.

When used for light cultivating purposes, grain runs may be removed by two bolts. In coming in contact with any solid obstruction a small bolt is sheered, allowing standard to fall back and over the object. Blades scour readily. This Implement is made by L. S. Youngren, of Kimmundy. One of these Attachments is now on display at the Banner Hardware Store and farmers are invited to inspect this double purpose implement.

Southern Alberta wool growers received an average of 34 cents a pound for the wool marketed through the Canadian Co-operative Wool Growers in Toronto, according to an announcement made by the Lethbridge representatives of the pool.

Alberta's Annual Musical Festival will be held this year at Lethbridge, from May 12 to 15, at which a large number of contestants are expected to be present.

Indian Conference And Pageant

The biggest "Pow wow" ever held by the Indians of the North American continent will be held in Macleod on July 1, 2 and 3, when over five thousand Indians from tribes all over Canada and America will meet together to discuss matters pertaining to their laws, and reservations.

Arrangements are now made for the holding of a big Indian Pageant, which will clearly demonstrate to their white brothers and sisters the wonderful advancement the Indian of North America has made during the last century, both in custom and education. Thousands of Indians from the Bloods, Blackfeet, Peigans, Crows, Crees, Stonies, Sioux and representatives from Six Nations in the East, will take part in this historic and picturesque Pageant.

There will be an exact representation of the great battle of "Whooop up" which was fought near Macleod and Lethbridge between the victorious Blood Indians and the Crees, one of the bloodiest massacres ever known in Indian history. The storming and burning of blockades and forts, the stage holds up so prevalent before the coming of the North West Mounted Police, the escapades between whiskey runners and Indians, all these will be given on different days of the celebration.

Good Sugar Beet Acreage Planted

Well over 6,000 acres have been prepared for the growing of sugar beets in the area tributary to the new beet sugar factory which is being erected at Raymond. Work is now being started on the factory which will be rushed to completion.

The Three New Pools

The total of 558 contracts have been already signed up by dairymen of the province, with the dairy pool.

The total of 1008 contracts have been signed with the livestock pool.

A total of 359 contracts, representing the production of 24,102 hens, have been signed up with the poultry pool.

This is the status of organization at the present date of the new provincial co-operative marketing pools, now in the process of formation, and for which a concentrated drive for membership will be undertaken during the three weeks from June 8 to 28 next.

The objective of the dairy pool is 33 and one third of the total milk and cream marketed in the province in the year 1923, based on figures of the department of agriculture.

The objective of the livestock pool is a marketing minimum of 2500 cars of livestock based on 25 head of cattle per car, 80 head of hogs per car and 100 head of sheep per car.

The objective of the poultry pool is 1,500,000 dozen eggs. The contracts signed to date cover a production of approximately 144,000 dozen or about 10 per cent of the objective.

This indicates satisfactory preliminary progress in the formation of the new pools, which will seek to market on a co-operative basis a large proportion of the dairy, livestock, and poultry of the farmers of the province. The severe winter weather and the road conditions made organization work difficult during the winter months but the fact that signed contracts for all of the pools are coming in daily indicates the spirit behind the movement, and the directors of the pools anticipate no difficulty in attaining the balance of their several objectives during the three weeks of the concentrated drive for membership from June 8 to 28.

CHINOOK SCHOOL BOARD MEET

The Board of Trustees of the Chinook Consolidated School District met in the School last Saturday afternoon. All the members were present.

The Collinholme Nazarene Church was advised that they may have the use of the school on Sunday evenings for Church service for \$2.00 and the janitor fees for each meeting.

That Messrs. Vargoe and Rideout be a committee to look after the repairing of the school roof, procuring the necessary additional amount of tar and pitch required for the purpose.

That a man-hole be put in the roof while the repair work is being done.

That \$5 be paid to the Canadian Credit Men's Association for the 4 venter coils left from the R. S. Woodruff stock.

Messrs. Vargoe and Rideout will arrange for van-drivers on Route No. 2.

After April 1st Route No. 3 started at Young's then to Deman's and to town. Rate of pay \$5. W. Deman drives the van on this route from May 1 to the end of the term.

That Route No. 4 be driven by Aug. Roscneau from April 1 to the end of the term, at \$6 per day, \$150 of which is to be paid in cash.

That van on Route 7 continue from Easter holidays until the end of the term at \$5 per day.

The Chairman and Treasurer were authorized to borrow from the Union Bank, Chinook, a sum of money not exceeding \$1,000, on the credit of the School grant for the present term.

A number of accounts were passed and ordered to be paid.

Chinook Cemetery

At this time of the year when every one is thinking of fixing their gardens by planting flowers, let us not forget that there is one place which should receive care and attention and that is our cemetery. What sight is more distressing, more depressing, than that of a burying ground unkempt and wild; where the grass is allowed to grow over the graves. Surely some small respect should be shown to the graves, of those who have gone before. They cleared the farms from which the harvest grows. They have helped to build the roads on which the autos now run, and those who follow in their trail reap the benefits.

The spring is the time for making a fresh start. Plant flowers and trees and awaken the people to a fresh responsibility. If the burying ground has been neglected in the past allow the reproach to continue no longer. Paint the fences, and fix paths and driveways around it and make the place a little cared for.

Alberta to be Represented

Alberta women will be represented at the International Council of Women to be held in Washington, D.C., shortly, by Hon. Mrs. Parlyb, Minister without Portfolio in the Alberta Government, and by Mrs. R. B. Gun, President of the United Farm Women of Alberta. Mrs. Parlyb will take part in the discussion which is to be held on the community property bill which she introduced into the Alberta House and which was held in abeyance until a later session in order that all opinions and views might be obtained upon it. The Act definitely establishes community property rights between husband and wife.
